COVID-19 Information

Revisions from 7/7/2021 in Purple
Revisions from 8/5/2021 in Green

BOARD OPERATIONS
The Board office hours are 8:30am-5:00pm Monday through Friday. Walk-ins are allowed from 9:00am to 4:00pm Monday through Friday. Masks are required for all members of the public regardless of vaccination status in accordance with the State Executive Branch guidance.

GUIDANCE FROM STATE AND FEDERAL PARTNERS
The Kansas Department of Health and Environment has a COVID-19 Resource Center on their website which allows consumers to subscribe to updates and provides links to frequently asked questions and CDC coronavirus information.

BEST PRACTICE RECOMMENDATIONS
To minimize contact and spread of COVID-19, the Board recommends pharmacies encourage customers to utilize drive-through or delivery where they are available. The Board also recommends requesting customers space themselves out when waiting in line and that the pharmacy consider the use of some sort of counter extension or plastic barrier to establish a larger gap between the customer and the cashier, where possible.
Pharmacists should use their professional judgment to ensure policies and procedures are in place to protect Kansas patients. The Board has received consumer complaints related to pharmacy personnel observing appropriate health and safety protocols and prevention measures. Pharmacies are required to comply with all state and local orders. As a reminder, the Board may discipline any pharmacist, intern, or technician upon a finding of unprofessional conduct, which includes conduct likely to harm the public. The CDC has also issued recommendations for face coverings likely to harm the public. The CDC has also issued recommendations for face coverings likely to harm the public.

REMOTE WORK
The Board has made the decision to temporarily allow remote work by pharmacy employees. This allowance only applies to pharmacies physically located in Kansas and persons licensed or registered with the Board. This allowance will remain in effect and be reviewed by the Board at their meeting on December 2, 2021. Upon review, the Board will provide at least 30 days notice for any plan to discontinue remote work. The Board suggests the pharmacy maintain documentation regarding the employee’s high-risk status. The Board expects nonresident pharmacies to allow remote work only in accordance with guidance issued by the governing body in the resident state. The Board guidelines for remote work are as follows:

Pharmacies:
- Remote workers must have secure, electronic access to the pharmacy prescription processing software.
- **Special Reminder from the Board:** Any technology used by pharmacy personnel must meet HIPAA compliance standards. The Board also expects HIPAA safeguards to be in place at the location of remote work so that non-employee persons present at the location are not able to see or have access to patient information.
- The Board will not offer guidance as to whether a pharmacy’s established processes meet federally-required security and privacy standards.
- The pharmacy must maintain a document (for 5 years) at the pharmacy that includes:
  - A list of all employees working remotely which shall include:
    - Name and license/registration/permit number of the employee
    - Address where the employee will be located when performing the remote activities
    - Phone number where the employee can be reached when performing the remote activities
  - The date range that the pharmacy conducted remote work activities
- All remote activities must be able to meet Kansas requirements for recordkeeping and documentation including, but not limited to, tracking the specific personnel who performed various steps in the dispensing process.
- All physical dispensing activities (tablet counting, packaging, labeling, compounding, etc.) and final product review must occur on-site at the pharmacy.
- Nothing in this guidance is intended to allow a pharmacy to be open without a pharmacist physically present at the pharmacy. See K.S.A. 65-1637c.

Pharmacists:
- The pharmacist must be licensed in Kansas.
- Any supervision of technicians, including those working remotely, must be conducted by a pharmacist physically located at the pharmacy. A pharmacist working remotely may not supervise a technician.
- The 4:1 technician to pharmacist ratio is still in effect and includes any technician working remotely. See updated K.A.R. 68-5-16, effective February 7, 2020.
Technicians:

- Only grandfathered technicians and technicians that have passed an approved national certification exam may work remotely. This includes technicians with 14- prefixes to their registration number. Technicians with 24- prefixes to their registration number are not allowed to work remotely.
- Technicians may only work remotely during the pharmacy’s regular business hours.
- Technicians may perform the following tasks when working remotely:
  - Data Entry
  - Order Entry (hospital pharmacies)
  - Refill queue processing
  - Sending refill requests to prescribers by automated methods
  - Insurance Processing or Billing
  - Contacting patients for clarification of personal data and insurance processing information (i.e., date of birth, insurance information, etc.)
    - Please note: Patients may be unwilling to provide personal information to a person calling from a phone number unrelated to the pharmacy. Please do not be forceful with patients in these situations and have the technician contact the pharmacy to call the patient directly.
- While working remotely, technicians may not:
  - Directly contact prescribers or prescriber offices for clarifications or refills
  - Directly contact patients for issues related to medication therapy.
  - Please note: This list is not exhaustive and the supervising pharmacist should rely on the aforementioned list of approved activities to direct technicians.
- Any technician working remotely must maintain direct communication capabilities with the supervising pharmacist (located at the pharmacy) at all times. A video component is not required.
- Electronic supervision services are separate from remote supervision allowance provides by the Board. Electronic supervision is already allowed for hospital pharmacies for the supervision of one technician per pharmacy. The pharmacist may still supervise up to the 4:1 technician ratio. See K.A.R. 68-22-1 through K.A.R. 68-22-5.

For interns:

- Except as provided below, interns may work remotely to perform technician functions and are expected to follow the guidelines for technicians. Any hours spent working remotely to perform technician duties shall not count towards the intern hours required by the Board.
- Interns may complete non-patient intern hours remotely through journal clubs, drug updates, presentations, etc. at the direction and discretion of the school and preceptor.
- Interns completing APPE rotations and paid interns with at least a P4 status may work remotely to fulfill non-dispensing functions at the discretion and direction of their preceptor.
- Pharmacists should exercise appropriate discretion but are not limited by a specific ratio in supervising interns providing immunizations at vaccine clinics.

IMMUNIZATIONS
The U.S. Department of Health and Human Services has expanded the PREP Act to include authority for pharmacists, pharmacy interns, and pharmacy technicians to provide immunizations. Such authority supersedes the authority of the State of Kansas related to immunizations (KSA 65-1635a).

According to HHS, amendments independently authorize State-licensed pharmacists to order and administer FDA-approved immunizations to children ages 3-18 years, and order and administer...
COVID-19 immunizations pursuant to FDA authorization. In addition, HHS has granted authority for interns and technicians to administer these immunizations under the direct supervision of the pharmacist who has ordered the immunization. HHS has now expanded this authority in an eighth amendment to allow interns and technicians to administer seasonal influenza vaccines to persons 19 years of age and older under the direct supervision of the pharmacist who has ordered the immunization. All pharmacy personnel are required to be properly licensed/registered in Kansas to perform these functions. The authority is subject to the following requirements:

- Participating pharmacists, interns, and technicians must:
  - Complete an ACPE immunization certification course;
  - Have a current CPR certificate. No expiration date waiver is allowed.
  - Complete a 2-hour, ACPE-approved continuing education course in immunizations within the current state license period. Note: This is not required by Kansas law, but is required to be eligible under the PREP Act and will count toward Kansas CE requirements.

- Comply with Kansas immunization recordkeeping and reporting requirements, including informing the patient’s primary-care provider, submitting to Kansas WebIZ, reporting adverse events, and complying with requirements whereby the person administering a vaccine must review the vaccine registry or other vaccination records prior to administering a vaccine. See K.S.A. 65-1635a.

- Inform any pediatric patient and the patient’s adult caregivers of the importance of a well-child visit with a pediatrician or other licensed primary care provider and refer patients as appropriate.

- The ordering and supervising pharmacist must be readily and immediately available to the pharmacy technician administering the immunization.

The federal guidance does not require a physician protocol and independently authorizes pharmacists to order immunizations. Pharmacists may continue using a physician protocol but cannot update the protocol to cover any immunization not authorized by KSA 65-1635a.

Review the HHS guidance for additional requirements. Links to HHS guidance:

The Kansas Department of Health and Environment has published the State COVID-19 Vaccination Plan, which can be access here: [https://www.coronavirus.kdheks.gov/284/COVID-19-Vaccine](https://www.coronavirus.kdheks.gov/284/COVID-19-Vaccine). Information includes COVID-19 vaccination provider recruitment and enrollment; ordering, distribution, and inventory; and storage and handling; and documentation and reporting. Make sure to check for any updates!

KPhA is providing a series of immunization training courses to prepare pharmacists and pharmacy technicians to administer vaccines. Information can be found on their website at: [https://kansaspharmacistsassociation.wildapricot.org/event-4072343](https://kansaspharmacistsassociation.wildapricot.org/event-4072343).
