INTEGRATION WITH K-TRACS

Pharmacy dispensing system integration makes using K-TRACS convenient and easy, with patient prescription history accessible within your pharmacy patient profiles.

Streamline clinical workflows by making patient prescription history available within your system

See real-time data with one click

Integrated users save an average of 4 minutes per patient lookup[1]

Integrated system users experience **fewer workflow interruptions** and use K-TRACS more frequently than web portal users.[2]

COSTS & AVAILABILITY

K-TRACS currently covers the license fees for healthcare organizations to connect with the state. However, you may incur costs from your software vendor if upgrades are needed or in the form of implementation and/or maintenance fees.

The K-TRACS vendor works directly with your EMR vendor and/or IT staff to facilitate the connection. In many cases, software vendors have developed a plug-and-play solution, making the project even easier to implement.
